

Novemba

Blair and Oliver were born on the same day in November. Astrologically speaking, they were fated to collaborate. Originally from Australia, they moved to London to pursue what they do best: documenting life without the boring bits. Novemba love people, culture, far-flung places, and the challenge of interpreting it all through the eye of a camera.

Novemba's work has been recognised at major awards shows around the world, including advertising's most prestigious prize, a BLACK pencil at D&AD for their Frontline19 film made for Adam&EveDDB. They also won the coveted Frank Budgen Award for Best Director at the British Arrows for Alzheimer's Society and Best Director at Kinsale for the same film.
